

◆ Gemini

```
import matplotlib.pyplot as plt

# Read the generated Sobel image
sobel_image = cv2.imread('sobel_x.jpg', 0) # Read as grayscale

# Display the image
plt.figure(figsize=(8, 6))
plt.imshow(sobel_image, cmap='gray')
plt.title('Sobel X Edge Detection Result')
plt.axis('off')
plt.show()
```

Sobel X Edge Detection Result
